

# Rakesh Vankadara

Cybersecurity Student & Aspiring Security Professional

9951549210 | rakeshvankadara@gmail.com | github.com/rakeshvankadara-netizen

## PROFESSIONAL SUMMARY

B.Tech cybersecurity student with hands-on experience building practical security tools focused on network traffic analysis, password security, and file integrity monitoring. Experienced with Python, Scapy, Tkinter, SHA-256 hashing, and Git & GitHub. Interested in developing practical cybersecurity skills and gaining real-world experience.

## TECHNICAL SKILLS

|                |                                                                 |
|----------------|-----------------------------------------------------------------|
| Programming    | Python                                                          |
| Cybersecurity  | Network Security, Cybersecurity Fundamentals, Password Security |
| Security Tools | Scapy, File Integrity Monitoring, SHA-256 Hashing               |
| Development    | Tkinter GUI Development, Git & GitHub                           |

## CYBERSECURITY PROJECTS

### Network Traffic Analyzer

**Technologies:** Python, Scapy, Tkinter

- Built a network traffic analysis tool that captures traffic, identifies protocols and ports, and detects security anomalies including port scans and TCP SYN activity.

### Password Security Analyzer

**Technologies:** Python, Tkinter

- Developed a password strength analyzer using length, character requirements, common-password detection, number-only detection, and repeated-character checks.

### File Integrity Monitor

**Technologies:** Python, Tkinter, SHA-256, JSON

- Developed a file integrity application that creates SHA-256 baselines and detects modified, new, and deleted files through baseline comparison.

## CERTIFICATION

- Introduction to Cybersecurity** — Cybersecurity fundamentals certification.

## EDUCATION

- B.Tech — 3rd Year**, Kalasalingam University
